WWW.PRECISIONINDUSTRIES.ME - INFO@PRECISIONINDUSTRIES.ME

PRECISION is a design and build aluminum, glazing and wood contractor that has been working since 1992 under the umbrella of BEGAS sarl, (Bureau d'Etudes Georges Anis Sfeir), providing utmost precision and finishing for BEGAS's projects.

In 2014, PRECISION was founded as a separate entity from BEGAS, to provide clients and contractors with the best in turnkey solutions to meet their needs.

Lead by a board of engineers and architects, the founders of BEGAS - who are behind successful projects and landmarks which you can check on www.begas.me - PRECISION promises to deliver the best in terms of quality, time and cost.

ALUMINUM

PRECISION is a certified partner of TECHNAL and SIDEM which supplies and installs all kinds of aluminum profiles including facades, curtain walls, skylights as well as internal partitioning and louvers, with a special expertise in TECHNAL, and SIDEM profiles, and our in-house designed and SIDEM tested and approved aluminum profile for internal partitioning of offices, DIGAMMA.

SIDEM – A reliable and trendy Lebanese designed aluminum profile

• SIDEM 2000

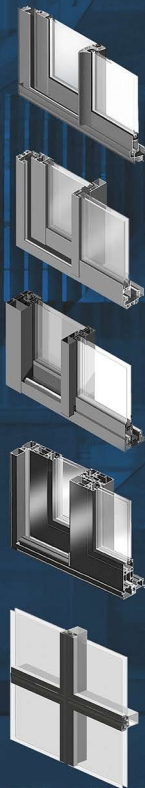

The traditional and affordable aluminum profile which can suit any architectural style. Available in sliding systems, hinged systems and fixed casement frames.

• SIDEM DELUXE

The newly designed, trendy and stylish profile by SIDEM offers a robust heavy duty system with a quiet sliding motion. Available in sliding systems, hinged systems, fixed casement frames as well as curtain walls.

TECHNAL – A state of the art engineered and designed French made aluminum profile

- **SAPHIR (also known as GX/GXI – FX/FXI)**

is the most commonly used aluminum profile for mid to high end projects. Available with or without thermal insulation, for sliding systems, hinged systems and fixed casement frames.

- **SOLEAL (also known as GY/GYn – FY/FYn)**

is the new standard profile from TECHNAL and the replacement of the SAPHIR series. This new profile offers an optimized thermal insulation and a more angular design. Available with or without thermal insulation, for sliding systems, hinged systems and fixed casement frames.

- **LUMEAL**

A concealed-opening slider with minimalist lines and only 68 and 77 mm of visible aluminum. This slim design gives 8 to 14 % more glazed area and hence around 35 % less visible structure.

- **GALENE (also known as GTI)**

A lift and slide aluminum profile, and the reference in thermal and acoustic insulation. Available for oversized openings, this profile offers a more luxurious design and finishing.

- **GEODE (also known as MX)**

Is a structural glazing aluminum façade, which allows the realization of glass facades, mechanically fixed on the aluminum structure. Available either with a visible grid (GEODE TRAME) or as a flush glass facade (GEODE SG). The structural glazing (SG) system requires a glazing made of two glass units separated by a continuous U profile, inside the silicone chamber, which permits the mechanical fixation onto the aluminum structure. Spandrel panel with glasses of 6mm to 8mm and aluminum composite Panel of 4mm.

GLAZING

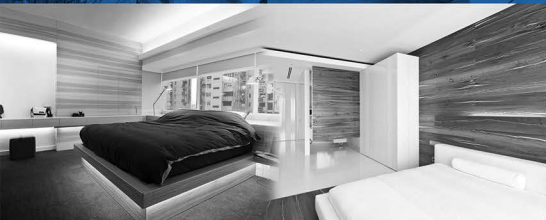

PRECISION supplies and installs all kinds of glazing including but not limited to clear float, tempered and laminated glasses of different thicknesses and sizes.

- Interior glass partitioning, tempered or tempered laminated glass bolted or fixed on u-shaped channels.
- Glass balustrades, tempered or tempered laminated glass bolted or fixed on u-shaped channels.
- Automatic sliding doors, with a European or Chinese made mechanism.

WOOD

You can never go wrong with natural wood to enhance your design, while providing a touch of sustainable and green architecture.

PRECISION offers a wide range of wood products and styles to meet your needs; doors, tables, closets, cupboards, as well as furniture of pure solid wood, veneered wood and laminated wood.

NOTABLE PROJECTS

Al Bustan Hotel – Beit Meri
The Gateway bldg – Zouk Mosbeh
Oakland Hotel – Rayfoun
Khoury bldg – Mtaileb
SAIFI 459 - Downtown Beirut
Coral Suites Hotel – Gym, Hamra

Neaime Chalfoun and Azar Residential Project
48 apartments – Ghosta
Geara Building – Baabdat
Hermes Villa – Ajaltoun
Takla showroom and offices – Jdeide
